

Application for assessment and certification by VAH according to the current Requirements and Methods for VAH-certification of Chemical Disinfection Procedures

Field of Application: Surface Disinfection

I. Name of disinfectant ¹:

II. a) Applicant (complete address)

b) Information to be printed on the VAH certificate (mandatory field)

Company (complete address)

Manufacturer (if different from applicant)

Should the address of the **manufacturer** appear on the certificate?: yes no

¹ fill in one product only; the product name and the name stated on the expert report must be identical.

VIII. How will the surface disinfectant be used:

1) **“with mechanical action”** (synonyms: wipe disinfection/by wiping), VAH method 14.2

- a) As concentrate or ready-to-use liquid/solution: Will be diluted to the use concentration by the user and applied immediately thereafter (test according to VAH test method 14.2a)
- b) As wipe dispensing or saturation system⁶ containing dry cloth material as specified by the manufacturer which is saturated with the product solution at the user’s site (test according to VAH test method 14.2b)
- c) As ready-to-use wipes⁷ provided by the manufacturer to the user pre-moistened as immediately ready to use (test according to VAH test method 14.2b)

For VIII b and c, the following information must be included in the test report and the application for certification:

- A1: Material composition (coating, if applicable):
- A2: Wipe size:
- A3: Weight in g/cm²:
- B: Saturation volume per wipe:
- C: Duration of use:
If the duration of use is to be declared in the certificate of a wipe dispensing system (VIII 1b) for more than one work day; the duration of use must be stated in days after preparation.

Information with respect to A1, A2, A3, B and C, if applicable, will appear on certificates for wipe dispensing systems according to VIII 1b only.

2) **“without mechanical action”** (synonyms: applied by spraying/without wiping), VAH Method 14.1

Note: Products listed “without mechanical action” must not be applied by wiping during the contact time; otherwise they must be tested according to the procedures “with mechanical action” (s. HygMed 2015;40-11).

The applicant hereby acknowledges and accepts the current terms and conditions for VAH certification of chemical disinfection procedures as laid down in the Catalogue of Requirements as well as in the bylaws of the Disinfectants Commission in the Association for Applied Hygiene (VAH).

⁷ The specification for the wipes must be included in the expert report and on the VAH certificate: composition, size, weight, saturation volume per wipe

Additional information for the online List (optional)

- ① Website of vendor:

- ② E-Mail of contact person:

- ③ This product is additionally listed with different concentration-contact time-ratios in:
RKI-List / Date of issue:

DVG (German Veterinary Society) List for the food processing area/ Date of issue:

DVG (German Veterinary Society) List for animal husbandry/ Date of issue:

- ④ The product is marketed in (please state countries using the international abbreviations

The applicant hereby grants permission to publish this information.
