

VAH. Simply be safe.
State-of-the-Art Disinfection.

VAH: Association of Applied Hygiene

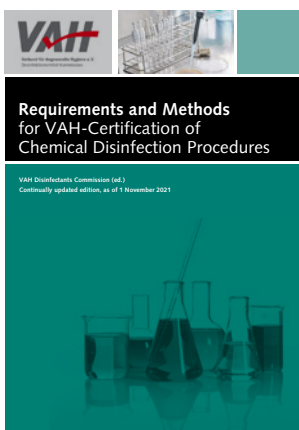

VAH

- is an Association of multi-disciplinary professional societies and associations with expertise in applied hygiene and disinfection, which is exclusively dedicated to the public's health and wellbeing,
- awards certificates for tested disinfectants following a conformity assessment procedure in accordance with VAH requirements, also reflecting current European standards,
- carries out sampling and retesting of VAH-certified products available on the market,
- develops methods for efficacy tests of chemical disinfection procedures,
- validates the quality of new or existing efficacy testing methods in ring trials,
- publishes all certified products in the open-access VAH List of Disinfectants,
- publishes test methods and requirements for VAH certification,
- publishes recommendations for the practical application of disinfectants,
- takes into account the current epidemiological situation, new technical developments, the interests and concerns of users as well as latest research results,
- takes into account the effects on humans and the environment caused by the use of disinfectants,
- maintains a website with a broad range of information and news on disinfectant testing as well as disinfectant usage.

VAH. Simply. Be Safe.

Standing together for more safety in infection prevention.

VAH LIST OF DISINFECTANTS

Product name:

Field of application (A):

Company name (B/C):

Spectrum of activity (D):

Pathogen (E/G):

Active ingredients (attention! The search may take longer for Contains exactly!):

Contains at least:

1313 products found.

Sort by (click) (show A to Z or Z to A)

PRODUCT	COMPANY NAME	FIELD OF APPLICATION	ADDITIONAL SPECTRUM OF ACTIVITY
1+1 Weisster® SC seper	KESLA PHARMA WOLFFEN GMBH	Hygienic Handwash	
1+1 Weisster® SC seper	KESLA PHARMA WOLFFEN GMBH	Surface Disinfection	
1+1 Weisster® SC seper	KESLA PHARMA WOLFFEN GMBH	Instrument Disinfection	
A 20	isochema GmbH + Co. KG a CURB DENTAL company	Instrument Disinfection	
A10P DES	Apuro GmbH	Surface Disinfection	
Alabus Flächen-Desinfektion	Alabus Chemiegesellschaft mbH	Surface Disinfection	
Alabus Handdesinfektion Gel	Alabus Chemiegesellschaft mbH	Hand Disinfection	
ALBACUS Handdesinfektion Liquid	Alabus Chemiegesellschaft mbH	Hand Disinfection	
Alabus Mittelreiniger/Reiniger	Alabus GmbH	Hand Disinfective	

VAH. Simply be safe.
Setting standards in
disinfection.

CHECK THE FACTS

✓ **All products in the VAH List** meet the quality requirements for the effectiveness of chemical disinfection procedures in all areas where disinfection is necessary and medically indicated in accordance with KRINKO (Commission of Hospital Hygiene and Infection Prevention) statements and recommendations as well as the recommendations of public health authorities and scientific societies in Germany (e.g., DGKH).

✓ **All products in the VAH List** meet the requirements of current European standards for the respective area of application with the VAH-certified specifications published in the List.

✓ **All products in the VAH List** are effective against bacteria, including antibiotic-resistant or gram-negative bacteria, as well as yeasts such as *Candida albicans*. These activity spectra are considered a minimum requirement when using disinfectants.

✓ **For all products in the VAH List** manufacturers have the option of having additional spectra of activity certified and listed. These are as follows:

- Tuberculocidal activity (areas of application: (hard) surfaces, instruments, textiles)
- Mycobactericidal activity (areas of application: (hard) surfaces, instruments, textiles)
- Fungicidal activity (i.e. effective against moulds and their spores, areas of application: (hard) surfaces, instruments, textiles)
- Sporocidal activity (i.e. effective against *C. difficile*, area of application: surfaces)
- Activity against viruses:
 - Active against enveloped viruses (area of application: hands, hard surfaces, instruments)
 - Limited spectrum of virucidal activity (area of application: hands, hard surfaces)
 - Virucidal (area of application: hands, hard surfaces, instruments, textiles)
 - Virucidal PLUS (area of application: hard surfaces)

✓ **For all products in the VAH List** which are certified for any of the above-mentioned efficacy spectra, at least two independent expertises and test reports were submitted to ensure their quality and their conformity with the requirements for certification by the VAH was confirmed. As a further quality assurance step, only test reports from laboratories which regularly participate in VAH ring trials in the area of efficacy testing are accepted.

2003 – 2023: 20 years of VAH
